

- ① Only 1.6 kg dead weight
- ② Large, stable handle

- Up to 50 kg load-bearing capacity on a steel sheet S235 with a thickness of just 3 mm
- Protects hands and fingers from hot and sharp-edged steel
- A must have for everyone who needs to move welding parts from one place to another (max. temperature: 60°)
- Wear-resistant magnetic contact area made of hardened steel with TiN-coating preventing damages and guaranteeing a long lifetime

Technical data TMH 50:

- Dead weight: 1.6 kg
- Max. load-bearing capacity on flat material: 50 kg (on 3 mm steel S235)
- Max. load-bearing capacity during vertical lifts: 35 kg (on 3 mm steel S235)
- Length: 126 mm; width: 80 mm; height: 100 mm (incl. lever: length 190 mm, width 124 mm)
